class results.

INFOR EAM BUSINESS EDITION

DO BUSINESS BETTER.

Capital assets often generate unseen costs that turn profit into loss. If you don't pay attention to the total cost of operating capital assets, you may be passing up the opportunity to ensure the success of your business for months or years into the future. Successful companies know that effective enterprise asset management (EAM) does more than add to the bottom line—it also reduces risk and gives your business a measure of stability that makes a big difference in volatile business conditions. Infor™ EAM delivers a time-tested solution that helps your company increase the life and value of assets, optimizes asset utilization, decreases costs of operation, and improves decision-making. It also gives you an easy to use solution that you can implement quickly.

LEVERAGE EXPERIENCE.

Infor EAM Business Edition is a powerful enterprise asset management solution that enables small and mid-size organizations to control critical functions such as work orders, purchasing, inventory, and preventative maintenance, without the investment and extended implementation time required for a larger-scale installation. Designed for companies with single or multiple sites, this solution increases productivity while reducing downtime by enabling organizations to manage several essential business functions from within a single web-based solution.

Infor EAM Business Edition provides companies that have small or no IT departments with a full-featured solution that delivers unparalleled insight into operations and can fully integrate with additional enterprise applications, advantages typically reserved for applications designed for large, multinational corporations. The security model is also uncomplicated, reducing installation time even further. System users access the features and functions of web-based Infor EAM software through a browser, working with an easy-to-use graphical user interface.

GET BUSINESS SPECIFIC.

Infor EAM Business Edition offers the features and modules you need for rapid return of value.

Features

- ▶ *Graphical user interface*—access the application through a standard web browser, a familiar tool that fosters user acceptance and reduces training. This application also features a built-in, drag-and-drop screen designer that allows you to custom design screens without any prior programming knowledge.
- ▶ *Predefined reports*—select from a variety of predefined reports including assets, materials, purchasing, scheduling, and work.

- ▶ *Key performance indicators (KPIs)*—leverage the software's pre-configured KPIs, which are based on industry best practices. Monitor critical asset performance indicators, such as proactive versus reactive work orders, without having to configure software or run reports. Using dashboard-like gauges, KPIs provide a snapshot of how assets are performing in an easy-to-read format, right from the product home page.
- ▶ *Web architecture*—access information stored in your application over any Internet or intranet connection. With Infor EAM, everyone from the CEO to the plant manager has a way to stay connected to every facet of operations.
- ▶ *Minimal hardware*—eliminate the need for separate hardware for the application, database, and reports. This application can run on a single server. You also can incorporate routes with a task under a single work order to service multiple assets that share similar requirements.

Modules

- ▶ *Assets*—identify, track, locate, and analyze your physical assets. By compiling asset data—such as location, cost history, warranties, claims, meters, and documents—with this Infor EAM application, you can maximize productivity and extend asset life.
- ▶ *Work management*—track all aspects related to work performed on assets, from installing new equipment to issuing corrective or preventive maintenance work orders. The ability to track and manage work requests, labor, planning, and scheduling enables you to make the most of your resources while improving productivity. For example, you can use Infor EAM Business Edition to approve requisitions for plant maintenance. You can easily view these work requisitions to see specific information, such as parts, service time, and personnel needed to fill the request. After reviewing all the details, you can approve the requisition online.

- ▶ *Preventive maintenance*—create preventive maintenance tasks based on a fixed date, flexible time period, or metered usage. Infor EAM can automatically adjust maintenance schedules to compensate for early or late preventive maintenance work accomplishment.
- ▶ *Materials management*—monitor and control the inventories of storerooms to minimize inventory holdings while fully supporting part and supply demands. Tools including class calculations and assignments support parts receipts, issues, returns, and cycle counts. This module offers a choice of automatic storeroom replenishment methods: Min-Max or Reorder Point-Order Quantity.
- ▶ *Purchasing*—ensure that the right parts are ordered, and track delivery times and goods receipts. This module addresses blanket purchase orders and quotation processing.
- ▶ *Mobile*—this popular add-on makes it possible to download work assignments from the Infor EAM database, using docking cradles or dial-up and wireless connections. It automates virtually every aspect of maintenance and data collection, and allows users to create field-based work orders, use drill-down menus to retrieve detailed information about a piece of equipment, and capture actual “wrench time” as work occurs.

Flexible Buying and Deployment Options

Infor now gives you unprecedented choice over how you purchase, deploy and manage Infor EAM Business Edition. Now you can get the power of Infor EAM Business Edition three different ways:

- ▶ On-Premises—Traditional perpetual software license operated by the customer on site
- ▶ SaaS Hosted License—Traditional perpetual software licensing with hosting from Infor
- ▶ SaaS Subscription—Customer subscription for on demand usage

With such a wide range of deployment and buying options for Infor EAM Business Edition, your company can choose the model that best meets your business needs.

The SaaS Subscription model and its monthly subscription-based pricing is the perfect choice if you need get up and running rapidly with a low initial start-up cost. If you prefer a traditional software license buying option, but you’d rather not deal with IT infrastructure and deployment requirements SaaS is just right for you.

In just about any scenario, your company can have Infor’s best-in-class EAM functions along with maximum configuration flexibility, to meet your business needs.

SEE RESULTS NOW.

Designed to get you up and running quickly, this preconfigured solution also is designed to get you up and running effectively and profitably. Customers using Infor EAM software have reported results such as:

- ▶ 20% improvement in labor productivity
- ▶ 20% reduced inventory carrying costs
- ▶ 10% increase in fleet availability
- ▶ 50% increase in warranty cost recovery
- ▶ 50% reduction in purchasing process costs

Unlike client-server software, which requires the installation of software for each client computer and offers limited operating interactions, this web-architected solution offers significant benefits including reduced IT expenditures, reduced maintenance time and effort, and a foundation for continuous, consolidated technology.

Infor EAM Business Edition is highly scalable and can grow with your business. It is fully upgradeable from release to release to further protect your investment, and you can easily upgrade to other products in the Infor EAM suite to realize even more benefits.

THERE IS A BETTER WAY.

At Infor, we work with a core belief. We believe in the customer. We believe that the customer is seeking a better, more collaborative relationship with its business software provider. And a new breed of business software: created for evolution, not revolution. Software that's simple to buy, easy to deploy and convenient to manage. Our 70,000 customers in more than 100 countries stand with us. We look forward to your sharing in the results of our belief. There is a better way. For additional information, visit www.infor.com.
